

Global Garden Preschool

Dear friends,

Elly's Dad, Omar has a fabulous piece of software that he is rolling out to crèches and preschools around the country.

This is a full suite solution, where we can add information about your little one and you can log on to get this information at any time. This could include images, info about development, times of arrival and departure etc. The software also helps me in terms of management of fees and HR so it's got the full piece available.

To this end I would be grateful if you would allow me to use the app. All data in the app is secure and trusted using robust data protection software.

If you are happy for me to begin to use this piece of software and your child's data to be stored in the app, I would be grateful if you could sign below. If you are not happy, please do let me know, it's not a problem in the world.

Kind regards

Ciara Watson
